

CGP FDLP Login Released

The U.S. Government Printing Office (GPO) has released a custom login feature for the Catalog of U.S. Government Publications (CGP) for Federal depository librarians. The CGP FDLP login provides the ability to:

- * Configure personal preferences (e.g., record sorting, record format).
- * Create and save personal sets of records using "My Bookshelf - Folder Management."
- * Save and/or e-mail record(s) from within search results.
- * Email and/or RSS alerts of recently added or updated records using Selective Dissemination of Information (SDI).
- * Access preferences and SDI profiles using the Library Card.

Furthermore, item numbers have replaced author in the brief results list and in the dynamic new titles searches.

Explore these new features by logging in with your library number and GPO-issued internal password. Login from the CGP home page or bookmark the login page using

<http://purl.fdlp.ov/GPO/gpo108> .
